## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: It is impossible to discern which strobe signals are applied for the differential versus the single-ended modes. The description provided in the specification is unclear or contradictory although this appears to be a central feature of the present invention. For example, on page 4, lines 12-16, this aspect of the invention is described in language that is not comprehensible and which is repeated throughout the specification. The last paragraphs of claims 4 and 6, claims 7-9 cannot be understood because of the non-grammatical language. Further, the disclosure is replete with grammatical expressions and confusing syntax.

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.
